

An environment of stability that fosters inclusive growth

Eli M. Remolona, Jr.
Governor
Bangko Sentral ng Pilipinas

Philippine Economic Briefing
Iloilo City, 11 December 2023.

Three challenges in sustaining growth

Monetary policy in a supply-shock economy

Digitalizing the banking system

A payments system that serves the unbanked

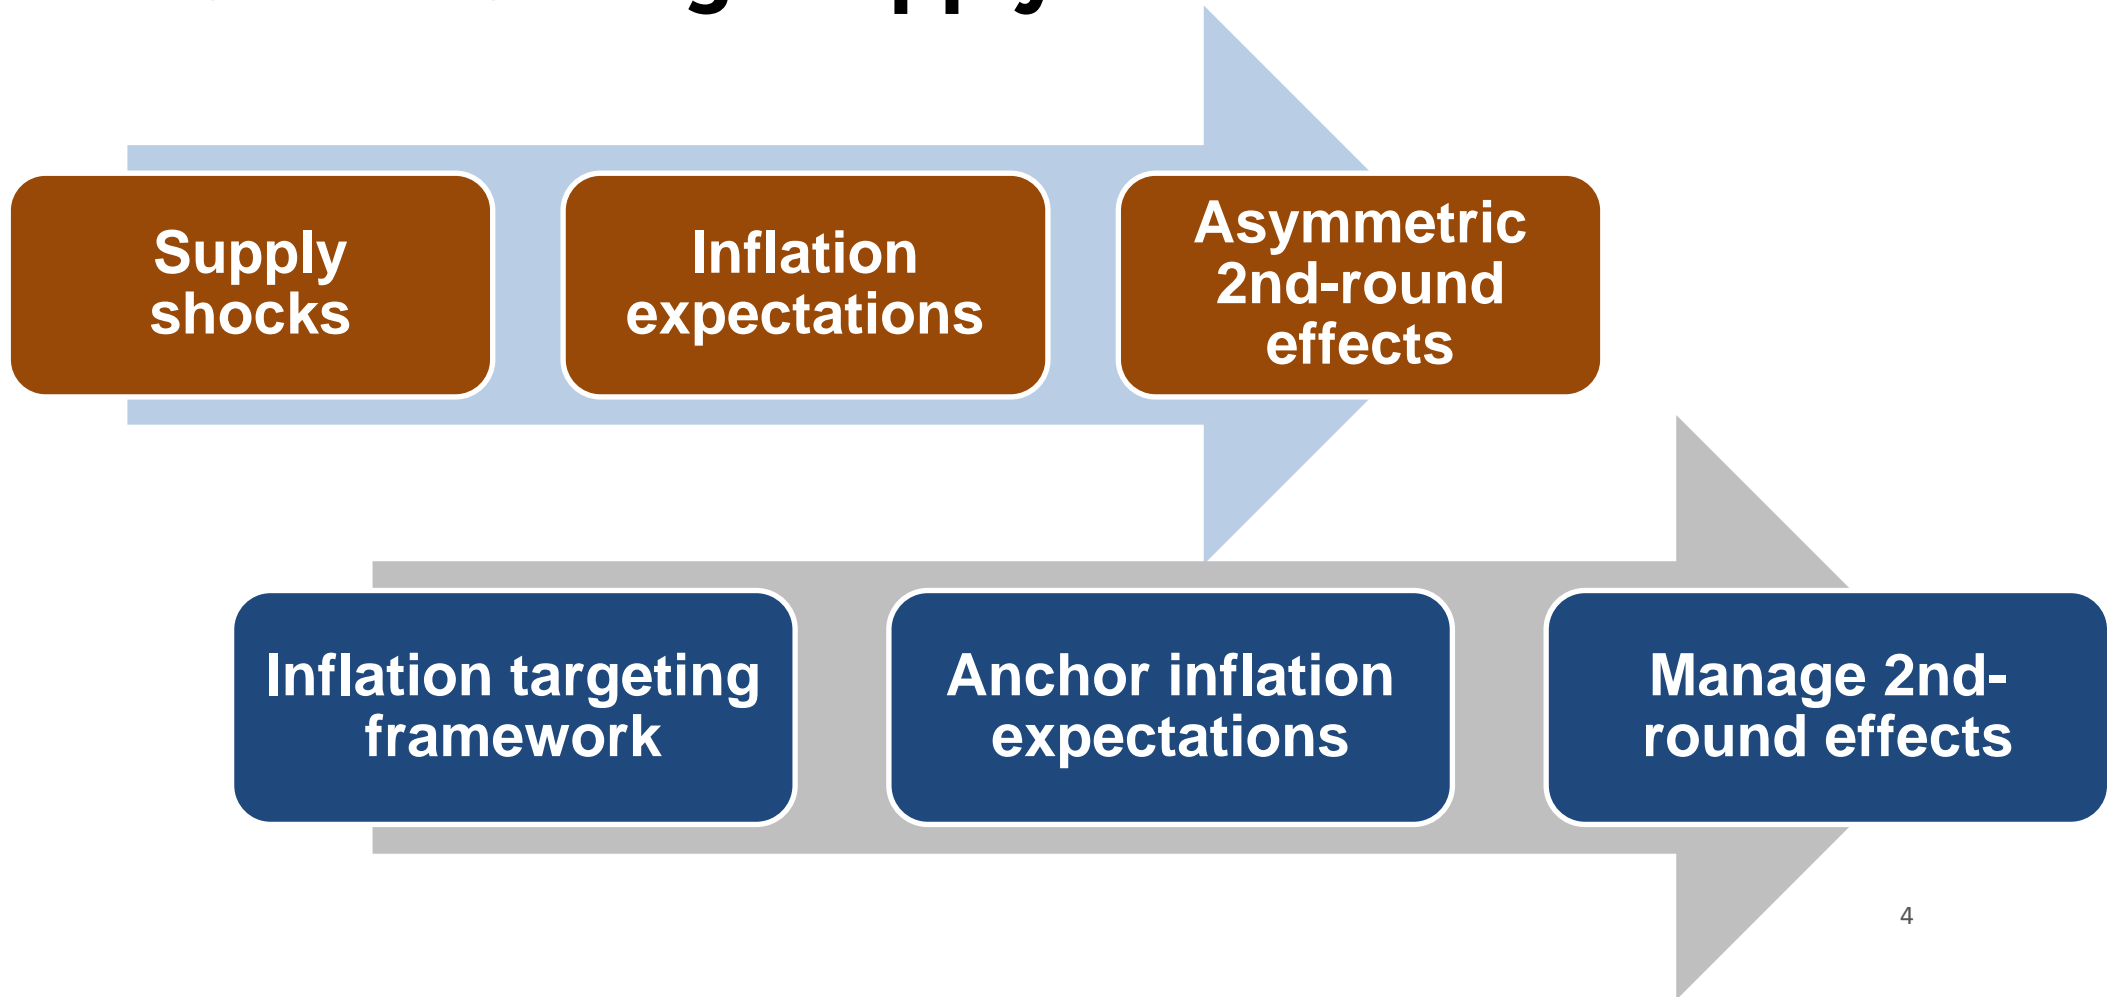

We were hit by supply shocks the likes of which we hadn't seen before

Supply shocks in oil, food, fertilizer and semiconductors gave us our highest inflation rate in 14 years

Headline and Core Inflation
Nov 2021 to Nov 2023 (in %)

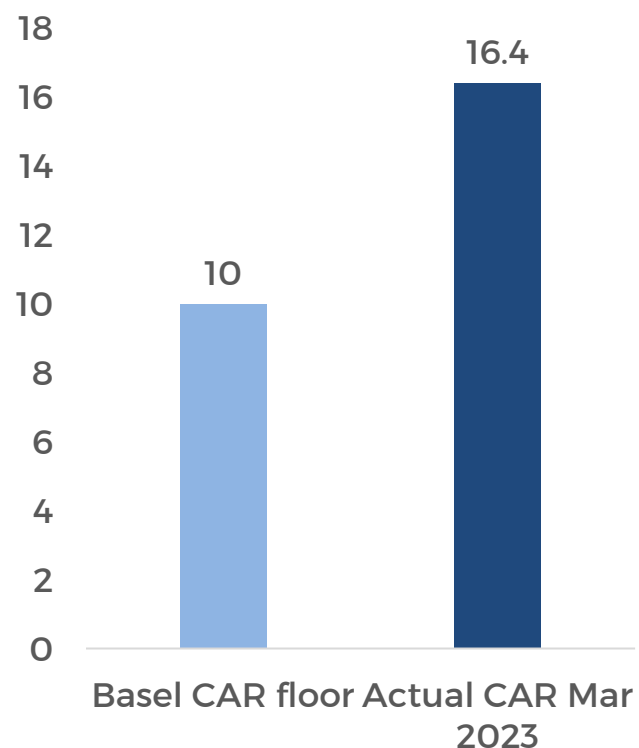

The monetary policy dilemma: whether to look through supply shocks

Our banking system continues to support growth

Capital adequacy ratio
U/KBs (consolidated basis, in %)

Liquidity coverage ratio
U/KBs (consolidated basis, in %)

To help our banking system digitalize, we offer four tools

**Open finance
framework**

Digital banking

**Regulatory
sandbox**

Generative AI

A digital payments system that serves the unbanked

As digital payments rise, so does access to the formal financial system

Share of digital payments to total transactions

(In %)

Percentage of Filipino adults with formal financial accounts

(In %)

Responses to three challenges

Monetary policy in a supply-shock economy is about anchoring inflation expectations

To digitalize the banking system, we offer the open finance framework, digital banking, a regulatory sandbox, and generative AI

To serve the unbanked, the payments system offers a gateway to financial inclusion and efficient cross-border payments
